Pressure transmitter COMPACT

for diaphragm seal operation, hygienic

Type series CC60 . .

Features

- Measuring ranges 0...250 mbar up to 0...100 bar
- Linearity error including hysteresis <+ 0.2 % f.s.
- Piezoresistive measuring system
- Hygienic design according to EHEDG, FDA und GMP recommendations
- Material and surface quality according to the hygienic requirements
- Wetted parts of stainless steel; completely welded
- Stainless steel housing as standard or field housing
- Degree of protection IP 65, IP 67 option
- Various output signals
- Process temperature up to 200 °C

Options

- Labom REconnect quick coupling device for easy and safe separation and connection of diaphragm seal systems; Type series MK1000, see data sheet D6-022
- Explosion protection for gases
- As per UKCA regulations
- Classi ication per SIL 2
- Inspection certi icate: material certi icate as per EN 10204-3.1

Application area

· Food industry
· Pharmaceutical industry
· Biotechnology

Application

The pressure transmitter COMPACT acts as a highly accurate converter of pressure measurements to load-independent current signals (4...20 mA, for example). Special attention has been given to a hygienic design.The completely welded stainless steel housing can be designed up to protection type IP 67. The use of temperature decouplers means that the COMPACT pressure transmitter can be used for process temperatures up to 200 °C.

Technical Data

Case design
Designs
· field housing IP 65 or IP 67, with cable gland
· right-angle plug per DIN EN 175301-803-A (DIN 43650, Form A), IP 65,
· cable connection, IP 67
· circular connector M12, IP 65
case material stainless steel
union nut: polyamide (with plug connector or cable connection for electr. connection)
electronics encapsulated with silicone.
Inner chamber aeration for measuring ranges < 16 bar over case thread or connection cable (depending on design)

Process connection
see next page or order code for variants
material-Nr.: 1.4404 (316L) for the sleeves

Temperature ranges
ambient temperature range: -25...+70 °C
option: -40...85 °C
storage temperature range: -10...+90 °C
process temperature: see order details

Measuring ranges/overrange limits
see order details
intermediate measuring ranges upon request

Response time
≤ 20 ms

Measuring accuracy
linearity error incl. hysteresis:
≤ 0.2 % f.s.
≤ 0.3 % f.s. for measuring ranges ≤ 0...60 bar fixed-point adjustment accuracy of adjustment:
<± 0.2 % f.s.

Temperature effect
a) case
in compensated temperature range 0...50 °C:
- zero point ≤ 0.2 %/10 K
- span ≤ 0.2 %/10 K
in compensated temperature range -40...0 °C and 50...85 °C
- typical 0.3 %/10 K
- max. 0.3 %/10 K

b) process connection (diaphragm seal)
depending on design

flat diaphragm	seal zero error
DN 25/1"	4.8 mbar/10 K
DN 32/1 1/2"	2.3 mbar/10 K
DN 40	1.6 mbar/10 K
DN 50/2"	0.6 mbar/10 K
inline diaphragm	seal zero error
DN 25/1"	9.5 mbar/10 K
DN 32/1 1/2"	4.1 mbar/10 K
DN 40	3.9 mbar/10 K
DN 50/2"	3.9 mbar/10 K

The specified zero error for the process connection is a guide value for a standard design. We can provide a detailed system calculation upon request. Systems with reduced diaphragm seal errors are also available.

Auxiliary energy supply
standard design:
· nominal voltage 24 V DC
· function range 6...30 V DC
· max. allowable operating voltage 30 V DC

Supply voltage influence
≤ 0.01 % f.s. / V

Output signal
4...20 mA, 2-wire technology
0...20 mA, 3-wire technology
4...20 mA, 3-wire technology
0...10 V, 3-wire technology

Current limitation in output signal
max. output current approx. 30 mA

Adjusting range
approx. ± 5 % f.s., zero point and measuring span separately adjustable

Burden
standard design $R_a = \frac{U_B - 6\ V}{20\ mA}$ (KOhm)
U_B = operating voltage
R_a = max. permissible burden resistance (incl. lead)

Burden influence
for 500 ohm burden change: ≤ 0.1 % f.s.

Functional safety
EN 61508, classification per SIL 2,
TÜV-Reg.-No. 44 799 13190204

Ex-approval
ATEX:
TÜV 00 ATEX 1557 X
marking:
Ex II 2 G Ex ib IIC T6 Gb
· U_{max} ≤ 30 V DC
· I_{max} ≤ 150 mA
· P_{max} ≤ 1 W
· Ci ≤ 49 nF
· Li ≤ 33 µH

Further technical data see Ex-instruction XA_006.

Weights (without diaphragm seal)
· field housing: approx. 460 g
· case with connector: approx. 200 g

Installation position
any

EMC test
· noise immunity according to EN 50082 section 2, version March 1995 issue for industry
· emitted interference according to EN 50081section 1, 1993 issue for residential and industrial areas
Device emits no radiation of its own

Dimensions

¹ negative relative pressure ranges (e.g. -1...+1 bar) are adjusted at works to 0...100%, e.g. 4...20mA.
Long-term vacuum measurements at temperatures above +50°C may cause changes in the properties of the measurement device.
Vacuum-proof designs are available upon request

² connector with cable see product group D6 (accessories)

³ low pressure ranges with increased temperature influence (zero point and span): max. = 0.4 %/10K

⁴ not valid for absolte pressure
