

Dear Business Partners,

the entire Sales Department, as well as many other areas were equipped with home office technology so that the preparation of offers and order processing continues without any limitations. The entire company was divided into several sections. Access across sections is restricted. The employees were instructed accordingly. Production was prepared for the coming period by splitting shifts, closing off narrow areas and ensuring a minimum distance between workspaces of 2.5 meters. The warehouse is well stocked so that we would currently be able to manufacture under normal circumstances until October. In spite of all the preparation, there is still uncertainty everywhere. However, since many of our measures have already been implemented in the last two weeks, we hope that we will remain capable of acting in the future and that we will be able to supply our customers, especially those who are in operation to maintain the basic daily needs and health of all citizens, with the necessary technology.

Please stay healthy!

Your LABOM-Team

A handwritten signature in blue ink, appearing to read "ppa. M. Dühr", with a long horizontal line extending to the right.
